

STORDIS

The High Performance Distributor

Europe's leading distributor in markets where storage, networking and computing speed are business critical factors.

> *STORDIS is the expert in delivering low-latency and high bandwidth solutions.*

With headquarters in Germany and offices in Paris and London, STORDIS focuses on generating business opportunities for both vendors and channel partners, by providing unrivalled technology performance into markets where it can deliver serious competitive advantage.

STORDIS uses its expertise to deliver true value added distribution: through experienced technical support, focused and informed marketing programs, and products' combination to create solutions which answer the exact needs of specific markets.

Founded in 2007 by experienced data storage industry veterans, STORDIS has rapidly become a key partner for the market leaders in High Performance Computing. The company differentiates itself by maintaining a tight business focus, with a permanent watch on the infrastructure solutions for data-intensive computing environments. This enables STORDIS to provide channel partners with the highest levels of expertise, offering refined, tested solutions and, most

importantly, delivering far shorter lead times on all the specialist products and peripherals needed to complete a working hardware foundation.

STORDIS offers both specialist components and complete, high performance computing solutions, including servers, networks, storage and all necessary cards, cabling and interconnects.

Today STORDIS is at the forefront of the High Performance technology market place and constantly seeks out the best performing products to stock them at the most competitive price.

STORDIS
The High Performance Distributor

ATTO

ATTO Technology, Inc.

ATTO Technology, is a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments: host and RAID adapters, bridges, RAID storage controllers, switches and management software.

Market proven 4 and 8 Gbit/s FC HBAs for MAC OS and other operating systems. Single, dual and quad port cards available.

Dot Hill Systems Corp. is a recognized leader in software and hardware solutions for storing, sharing, protecting and managing data.

All Dot Hill storage systems have no batteries, making them easy to service. The storage units are suited for HD, 2K, 4K and 3D post production film editing and also for archiving and backup. Full range of post sales support available.

EMULEX

Emulex are market leaders for fibre channel and converged networking solutions and provide enterprise-class connectivity for servers, networks and storage devices within the Data Centre.

The portfolio includes: Fibre Channel host bus adapters (HBAs), network interface cards (NIC), converged network adapters (CNA).

Finisar

Finisar Corporation is a global technology leader in optical communications components and subsystems.

Full range of highly reliable transceivers from the market leader. STORDIS stocks single and multi mode SFP, SFP+ and XFP transceivers for 1 & 10 GbE and 2, 4 and 8 Gbit/s FC usage.

FUJITSU

High performance switches : The Fujitsu XG-series of switches offer high-performance and high-speed Layer 2 switching. Featuring ultra-low latency, flexible interfaces and compact form factors, the highly reliable 1 and 10 GbE switches are ideal for bandwidth hungry network applications.

Private Cloud appliances : The NuVola Private Cloud Platform is an appliance-based solution built with class-leading Fujitsu storage and server products, and paired with best-of-breed third-party applications utilities to address critical and functional business needs within the commercial enterprise.

Using innovative technology, Gnodal is providing a range of solutions that will revolutionise the data center, significantly reducing power consumption, cooling and total cost of ownership thereby dramatically increasing resource utilisation.

The Gnodal GS-Series Switch Family provides the highest density, lowest latency Top-of-Rack 10 and 40-GbE solutions available on the market.

Our Suppliers

LEONI

LEONI is a global supplier of wires, optical fibers, cables and cable systems, manufactured in Germany, with related development services for applications across industries.

LEONI distinguishes itself through excellent competencies in cable assembly and has a comprehensive understanding of the conditions of use and technical correlations on the user's side.

LSI

The LSI product portfolio offers a wide-selection of full-featured RAID controllers, high-performance HBA's, flash storage technology and SAS Switch to meet a variety of application needs.

Mellanox is a leading supplier of complete end-to-end solutions (silicon, adapter cards, switch systems, cables and software) supporting InfiniBand and Ethernet networking technologies.

molex

Molex is a leading one-source supplier of interconnect products.

STORDIS stocks LC-LC Duplex cables from 1m to 300m. These cables are ideally suited for 8 Gbit/s FC and 10 Gb Ethernet networks.

Myricom

Extreme Performance

Myricom provides extreme-performance 10-Gigabit Ethernet products through a combination of its versatile NIC and specialized software.

Full bandwidth 10 Gb Ethernet NICs, with MAC OS, Windows and Linux support. SFP+ and CX4 single and dual-port NIC available from stock.

QLOGIC

A leading provider of data, server, and storage networking infrastructure solutions, QLogic® (NASDAQ: QLGC) is focused on the predictability and consistency of infrastructure.

8 Gbit/s FC switches and HBAs and a full range of 40 Gbit/s QDR InfiniBand switches and HCAs.

Silicom Ltd
Connectivity Solutions

Silicom has a 20-year history of providing the networking industry with innovative, state-of-the-art connectivity and networking solutions.

Optical and copper 1 and 10 Gb Ethernet NICs, ranging from single port right up to six port NICs, based on Intel or Broadcom ASICs. STORDIS holds numerous models on stock. Windows and Linux support only.
